PAWFECT PAWS GROOMING SYSTEM

- Customers can easily book grooming appointments online.
- Admins can manage bookings, services, and customer profiles.
- Users create accounts and log in securely.
- Each user has a role: customer or admin.
- Customers can add pet details and view grooming history.
- Admins can add, update, or remove grooming services.
- Appointment scheduling, cancellation, and management.
- All data is protected with secure login and privacy measures.

OBJECTIVES

- Streamline Grooming Operations: Build a system that simplifies daily tasks for grooming businesses.
- Automate Appointment Scheduling: Enable quick and hassle-free booking for customers and admins.
- Simplify Customer Management: Provide tools to create, update, and manage customer profiles efficiently.
- Enhance Service Catalog Management: Allow easy addition, modification, and browsing of grooming services.
- Ensure Secure Authentication: Protect user data with modern, secure login protocols.
- Support User Authentication and Role-Based Access Control: Allow customers to register, log in, and manage their profiles, while admins oversee the platform.

EXISTING SYSTEM

- Pet grooming services managed manually or with basic tools
- Appointments scheduled via phone calls or walk-ins
- Customer and pet records stored in paper files or spreadsheets
- No centralized platform for service and data management
- Limited access to pet grooming history and preferences
- Minimal data security: risk of information loss or misuse

PROPOSED SYSTEM

- Centralized web-based platform for managing pet grooming services.
- User-friendly interface for customers and administrators.
- Secure customer registration and login with role-based access.
- Pet profile creation with photo uploads and detailed attributes.
- Service catalog browsing and appointment booking functionality.
- Automated appointment scheduling and cancellation system.
- Admin dashboard for managing users, services, and appointments.

MOTIVATIONS

- Rising consumer expectation for “book-anytime, anywhere” convenience in pet services.
- Manual scheduling & paper records causing double-bookings, errors, and lost revenue.
- Need to boost customer loyalty through transparent pricing, instant confirmations, and timely reminders.
- Competitive pressure to modernize operations and stand out from traditional groomers.
- Opportunity to future-proof the business with a scalable platform ready for online payments, loyalty programs, and mobile apps •

FUNCTIONALITIES

- User Registration & Login :Secure access with role-based authentication.
- Pet Profile Management: Add, update, and view pet details with photos.
- Service Catalog Browsing :Explore grooming services with pricing info.
- Appointment Booking & Cancellation:Schedule or cancel appointments easily.
- Customer Dashboard :View appointments, pet profiles, and services.
- Admin Panel :Manage users, services, and appointments efficiently.
- Secure Authentication :Protect user data with robust login protocols.

MODULE DESCRIPTION

- **Customer Module**
- User authentication & profile management (register, log in, edit info).
- Create/update pet profiles (upload photos, include breed, age, details).
- Browse service catalog with pricing and descriptions.
- Book,view,schedule,or cancel appointments.

MODULE DESCRIPTION

- **Administrator Module**
- Manage user accounts and customer profiles.
- Oversee appointment schedules and service operations.
- Update and maintain service catalog (pricing, descriptions, offers).
- Monitor data consistency, minimize errors, and ensure smooth workflows.

DEVELOPING ENVIRONMENT

- Operating System: Windows 11
- Frontend: HTML5, CSS, Bootstrap, JavaScript
- Backend: Python 3
- Framework: Django (Python-based web framework)
- Database: SQLite
- IDE / Development Environment: PyCharm.
- Web Browser (for Testing): Google Chrome / Microsoft Edge
